---

       (2)   The prompt object's Count is either not present, or is less than or equal to the Count of the parent question control.

5 A QA control is run as follows:

       (1)   Determine which question control or statement control is active and increment its Count.

       (2)   If a statement control is active, play the prompt

10   and exit.

       (3)   If a question control is active, play the prompt and start the Recos for each active answer control and command control.

15 An answer control is considered active if and only if:

       (1)   The answer control's ClientTest either is not present or returns true, AND

       (2)   Either:

20   a.   The answer control was referenced in the active question contol's Answers string, OR

          b.   The answer control is in Scope

   A command control is considered active if and only if:

25

       (1)   It is in Scope, AND

       (2)   There is not another command control of the same Type lower in the scope tree.

30 RunSpeech relies on events to continue driving the dialog – as described so far it would stop after running a single QA control. Event handlers are included for
